EDUCATION

Georgia State University

PhD in Computer Science

Atlanta, GA

August 2026 - Now

Georgia Institute of Technology

Master of Science in Computer Science

Bachelor of Science in Computer Science

Atlanta, GA

August 2017 - December 2018

August 2015 - May 2017

PROJECTS

SmAlarm: AI-Powered Waking Up Smart Alarm - <https://youtu.be/uUgaKNPIZF8>

Atlanta, GA

Regression model to predict optimal waking up time based on Electroencephalography (EEG) data

April 2018

- Researched the most optimal waking up period within a time period during a person's sleep cycle.
- Analyzed and processed 5790 records of EEG data provided by National Sleep Research Resource.
- Transformed the raw data into $n \times 8$ features array with min-max normalization using PySpark.
- Performed regression training with 70% of the data and created a Logistic Regression classifier model with scikit-learn performing 77% accuracy and 94% precision.

WORK EXPERIENCE

NCR Voyix, Software Engineer Lead

Atlanta, GA

Commerce POS Solutions for Retail & Restaurants

February 2019 - December 2025

- Home landing page for next-gen NCR Voyix users - home.ncrvoyix.com
 - Implemented front-end, back-end, and database components to deliver a responsive and user-friendly experience.
 - Designed and implemented comprehensive CRUD methods for managing Shortcuts with role-based access control.
 - Developed reusable NCR Voyix Platform components using TypeScript and SCSS, ensuring consistent design and performance; deployed these components to private JFrog repositories.
- Centralized identity and access management - identity.ncrvoyix.com
 - Engineered a User and Persona Management UI enabling administrators to create, edit, and assign personas to users through a responsive and scalable interface.
 - Set up an Okta-hosted sign-in widget to provide a consistent brand experience across integrated applications.
- Knowledge hub and API documentation website - developer.ncrvoyix.com
 - Maintained and enhanced Angular application, focusing on continuous improvement, performance optimization, and vulnerability fixes.

SKILLS

Concepts & Theories: Supervised Learning, Logistic Regression, Model Training Optimization

Programming Languages: Python, TypeScript, HTML, Terraform, PostgreSQL

Framework & Libraries: React, Angular, .NET Core, Material UI, REST APIs, gRPC, PySpark, scikit-learn

Cloud Services: Google Cloud Platform, BigQuery, Elasticsearch, LaunchDarkly

LEADERSHIP & VOLUNTEER

IFGF Atlanta, Music Coordinator

Atlanta, GA

- Planned and led music for weekly services and quarterly music leader meetings. *August 2023 - Now*
- Directed and coordinated musicians and volunteers to enhance the overall worship experience.
